Lodging:	We are happy to recommend upon request / Guesthouse:www.pitztalerhof.at / Boarding houses:www.haus-florian-wenns.at / www.landhausd-gasser.at

Special features and options

In the course "Diorama Nativity Building with Antonio Pigozzi" we build a typical diorama nativity according to perspective principles together with the great Italian nativity builders Antonio Pigozzi, Nicolo Celegato and Domenico Petrucci. These diorama nativities are completely executed in Styrodur. Walls are scratched with pencil or small burning sticks and dry grouted. Terrain parts and rocks are plastered over and painted accordingly, The distant mountains and hills are also built here. Appropriate botany and painting of the nativity complete the landscape and thus convey an immense spatial depth. With the right figures made of clay or wood these "Italian peepbox nativities" become particularly attractive unique pieces. If required we will gladly organize the corresponding boxes and lighting on request. Surcharge variable depending on box size from € 180,- to 270,-. We are already looking forward to the great collaboration with Antoni Pigozzi and his helpers!!!
