## Special features and options

In the course "Masterful Oil Painting" we dive into the royal class of traditional techniques of visual art. We paint here like the old masters of the Renaissance. The priming of the painting ground, called Imprimatura, is executed in a middle shadow tone of the object to be painted. Following this, we work out the light and shadow parts in generous areas. Only when the picture has all essential lights and darks do we lay the colors over it. With this technique one achieves an incredible luminosity of the colors. The "Masterful Painting Technique" is particularly well suited for portraits. Much joy painting with oil paints!
