Special features and options

In the "Painting Backgrounds for Advanced Students" course, we begin with a theoretical introduction. We deal with the core topics of naturalistic landscape painting in general. The essential differences to background painting are shown and discussed regarding composition, color intensity, tonal values, lighting effects, depth perception, and color theory. We start by mixing colors for the sky and work step-by-step on creating a background picture according to individual needs. Painting people and animals onto the background is part of this course upon request. All styles are possible. As a rule, we work with powder paints. However, it is also possible to paint with acrylics. Enjoy painting backgrounds! Peter Riml
