Special features and options

MARBLING - Course with Sonja Thurner Marbling is a creative technique in which colorful patterns are created that resemble real marble. Colors are applied to a surface and gently swirled. Subsequently, you can move the colors with brushes, sponges and pens to create exciting patterns. Since the colors always distribute differently, each piece is unique. This technique is often used for art and craft projects. You can use it to design greeting cards, wrapping paper, book covers or even decorations such as columns and vases. Furniture can also be decorated in this way. There are various materials and methods available for marbling. However, we exclusively use acrylic paints. Marbling is not only fun but also has a calming effect. The flowing colors and experimenting with patterns make this technique exciting for beginners and professionals alike. Have lots of fun and good success!
