Special features and options

In the course "Background Painting for Advanced Students" we begin with a theoretical introduction. We deal with the core topics of naturalistic landscape painting in general. The essential differences to background painting are shown and we discuss image composition, color intensity, tonal values, lighting effects, depth effect and color theory. We start by mixing the colors of the sky and work out step by step the image composition of a naturalistic landscape picture. Painting exercises with trees, shrubs, walls, stones etc. As a rule we work with powder paints. However it is also possible to paint with acrylic paints. In this course people and animals in the background picture are also treated on request. Much joy at the further training in "Background painting"!
