Lodging:	If required, we are happy to recommend / inn:www.pitztalerhof.at / guesthouses:www.haus-florian-wenns.at / www.landhaus-gasser.at

Special features and options

When building a picture nativity scene, all styles and nativity depictions are generally possible. In a small box with an attached frame and relatively little depth, we build attractive nativity scenes such as the Annunciation to Mary, the search for lodging, the adoration of the shepherds, the adoration of the kings, the rest on the flight, Joseph's dream, etc. As materials we mainly use Styrodur and cork bark. Lighting is an important component of these small nativity scenes. LED light with a voltage of 12 volts is used here. The figure size should be adapted to the overall size (up to a maximum of 15 cm, depending on the depiction). An attractive background image gives the depiction the appropriate depth and is essential for a harmonious overall image. These picture nativity scenes are mostly hung on the wall at eye level and are a space-saving variant of box nativity scenes!
